

## Position Overview: Junior Web Developer

Bozell is seeking a passionate and talented junior web developer for their interactive team. The position is available now for someone with web, programming and problem-solving skills and the ability to think using both sides of the brain.

Responsibilities include:

- Development and maintenance of client websites and their supporting systems
- Conversion of website design files (Photoshop/Illustrator) into working websites
- Programming of back-end systems in ASP.NET or PHP for integration with front-end websites built using, X/HTML, CSS and JavaScript libraries like jQuery
- Setup and development of web Content Management Systems like WordPress, Joomla! and Drupal
- Development and maintenance of custom web applications
- Executing standards-based email marketing campaigns
- Web, Mail, and File Server administration on Windows and Linux systems
- Implementing Search Engine Optimization plans
- Customer service and support
- Other duties as assigned

## Minimum Skills & Qualifications

The qualified candidate will demonstrate experience in the following areas:

- Thorough knowledge of using X/HTML and CSS for standard's compliant web development
- JavaScript and using libraries like jQuery to provide rich client side experiences
- Experience with Microsoft SQL Server and/or MySQL preferred
- Experience with PHP and/or C#/ASP.Net preferred
- Experience with Apache and/or IIS preferred
- Experience with FTP, SMTP, POP3, HTTP and related protocols
- Familiarity with common development tools and environments like Microsoft Visual Studio or Dreamweaver
- Familiarity with optimizing images using Photoshop and integrating graphics into web pages
- Familiarity with basic Search Engine Optimization principles
- A desire to learn every day and ability to find answers when needed
- Extremely detail-oriented and organized
- Ability to work in a team environment
- Ability to work unsupervised
- Excellent problem solving skills
- Excellent verbal and written communication skills

Familiarity with additional Internet and related technologies is highly desirable.

## Process

Please submit **resume and URLs** of your web development work. *Applicants without accessible URLs of demonstrable web development will not be considered.* Sites need not be commercial development work, but should demonstrate the applicant's knowledge and understanding of the medium.

We maintain a high-energy environment for people who are very passionate about what they do. We provide plenty of challenge and hard work, but in a casual and fun environment. We want people to have a positive attitude about their work and participate in something where their input is respected and appreciated.

If this sounds like the position for you, send us your resume and URLs, along with a brief message about yourself, your background, your career objectives and how you think you could help our company. We will contact you with more information.
